# Joshikha S

+91 6379160221 | joshikhashankaran19@gmail.com | LinkedIn | GitHub | Portfolio

## SUMMARY

Computer Science student and full-stack developer experienced in building scalable web applications using React and FastAPI. Strong in designing low-latency backend systems, REST APIs, and end-to-end product development. Skilled at building production-ready systems and handling real-world performance constraints.

## EDUCATION

**SRM Institute of Science and Technology** *Aug 2023 – Present*
B.Tech in Computer Science CGPA: 8.91 Chennai, India

## SKILLS

**Languages:** Python, JavaScript, C/C++, Java, SQL

**Frontend:** React.js, HTML, CSS

**Backend:** FastAPI, REST APIs, API Design, Git/GitHub

**Systems:** Low-Latency Systems, Scalable Backend Services, Concurrent Request Handling

**Tools:** Postman, Jupyter, Google Colab

## EXPERIENCE

**Winter Research Intern** *Certificate*
University of Ilorin, Nigeria

- Built backend-integrated diagnostic system with real-time data processing and inference pipelines.
- Designed scalable system architecture focusing on performance, reliability, and modularity.
- Developed structured workflows for data ingestion, preprocessing, and API-based inference.
- Took ownership from system design to implementation and documentation.

## PROJECTS

**Low-Latency Log Processing System | Python, APIs**
Link

- Built a scalable log processing pipeline optimized for low latency and high throughput.
- Designed modular backend system with dynamic routing for efficient request handling.
- Simulated production-scale workloads and optimized system performance under constraints.

**Backend Interference Detection System | FastAPI**
Link

- Developed backend services for data ingestion, preprocessing, and real-time predictions.
- Designed REST APIs enabling structured and scalable inference workflows.
- Optimized system performance for consistent low-latency responses.

**Scalable Bus Tracking Platform | React, FastAPI**
Link

- Developed a full-stack real-time tracking system using React frontend and FastAPI backend.
- Built REST APIs handling concurrent requests with low-latency responses.
- Designed system architecture for real-world scalability and continuous data updates.

## RESEARCH & ACHIEVEMENTS

**International Conference Presenter – ICICDT 2026** *Apr 2026*
SRM Institute of Science and Technology Certificate
– Presented research on AI-based system design for financial forecasting.

**Smart India Hackathon 2025 – Internal Finalist**
SRM Institute of Science and Technology
– Ranked among top 75 teams out of hundreds at university level.

**Assistant Head – PR & Management, Logic Play Club**
SRM Institute of Science and Technology
– Led team coordination and event management initiatives.
